

Jack Morgan

Computer Science Graduate | Seeking Entry-Level Roles in Cybersecurity & Security Operations

Personal Statement

First-Class Computer Science graduate with a strong interest in cybersecurity, particularly system security, infrastructure, and risk management, and currently working towards the IBM Introduction to Cybersecurity Essentials certification. Experienced in cloud deployment, encryption tools, and sensor-based security systems. Proven ability to learn quickly, solve problems, and contribute to secure, reliable systems. Seeking a graduate role with on-the-job training to develop real-world cybersecurity skills.

Professional Skills

- **System Testing & QA** – Experienced in structured testing, bug tracking, and performance profiling across academic and collaborative projects.
- **Cloud Infrastructure** – Deployed static websites via AWS S3 and CloudFront; familiar with CDN configuration and hosting principles.
- **Encryption & Data Handling** – Built tools using Caesar Cipher and Firestore for secure data operations and privacy-focused design.
- **IoT & Embedded Systems Security** – Developed sensor-based security prototypes using Arduino and Tinkercad, with multi-output alert systems.
- **Technical Documentation** – Produced detailed design and testing documents for complex systems, including VR safety training and robotics.
- **Version Control & Collaboration** – Proficient with Git, GitHub, Trello, and Discord in team-based development environments.
- **API Integration & System Design** – Integrated Google APIs and Python-based control systems in robotics and web applications.
- **Adaptability & Problem Solving** – Quick to learn new tools and workflows; thrives in dynamic environments with a focus on reliability and security.

Work Experience

05-2025 – Present	Cosmic Sabbath – Remote, UK Lead QA Tester & Gameplay Programmer Led quality assurance across multiple gameplay systems, identifying and resolving bugs to ensure system stability. Collaborated with cross-functional teams to optimise performance and enhance user experience. Documented technical issues and contributed to gameplay improvements through structured testing and feedback.
03-2018 – 06-2025	Opsters eSports – Remote, UK Founder & Web Developer Built a responsive eSports website with HTML, CSS, and JavaScript, featuring interactive brackets and dynamic filters. Delivered optimised UI/UX with SEO and GitHub version control.

Portfolio

<https://jack-morgan22.github.io>

Programming Languages

- ❖ Python
- ❖ C++
- ❖ HTML
- ❖ CSS
- ❖ JavaScript
- ❖ C#

Tools

- ❖ Git
- ❖ GitHub
- ❖ AWS S3
- ❖ Cloud Front
- ❖ Trello
- ❖ Firebase
- ❖ Arduino
- ❖ Tinkercad

Education

2022-01 – 2025-07	BSc Computer Science: Computer Science and Engineering <i>University of Wolverhampton - Wolverhampton, WLV</i> <i>Grade: 1st Class Honours</i> Key Modules: Cloud Systems, Distributed Computing, Big Data, Embedded Systems, Software Architecture, Robotic Engineering, Emerging Technologies, Collaborative Development. Hazard Perception VR (Dissertation) <i>Developed a VR training tool for learner drivers using AI-driven traffic and adaptive difficulty. Focused on safety, user interaction, and system reliability.</i> Caesar Cipher Encryption Tool <i>Created a Python-based utility for encrypting and decrypting text via console and file input. Demonstrated understanding of basic cryptographic principles.</i> Arduino PIR Motion Sensor Security System <i>Built a hardware prototype using Arduino to detect motion and trigger multi-output alerts. Explored physical security and sensor integration.</i> AWS Static Website Deployment <i>Configured an S3 bucket and CloudFront CDN to host a secure static site. Gained experience in cloud infrastructure and deployment pipelines.</i> Voice-Enabled Book Review App <i>Integrated Google Firebase with Google Home for voice-controlled CRUD operations. Demonstrated secure API usage and smart home interaction.</i> Survey4All – Collaborative Project <i>Led development of a secure survey platform, managing roles like Cyber Security and ensuring password encryption and compliance. Delivered a functional product through effective planning and team coordination.</i>
-------------------	---

2019-09 - 2021-06	A Levels: Photography, Media Studies and Film Studies <i>Telford College - Telford, TFW</i>
2015-09 - 2019-06	Relevant GCSEs: Maths, English, Science, Interactive Media, Enterprise and Marketing <i>Telford Priory School - Telford, TFW</i>

Certifications

- ❖ **Cybersecurity Essentials** (IBM, Nov 2025)
- ❖ **Fundamentals of Operating Systems** (CodeAcademy, Mar 2025)
- ❖ **Intro to Cloud Computing** (CodeAcademy, Apr 2025)
- ❖ **Intro to the Command Line** (CodeAcademy, Apr 2025)
- ❖ **Cyber Security Awareness Training** (Cyber Quarter, Mar 2024)
- ❖ **IBM MQ Developer Essentials** (IBM, Nov 2023)
- ❖ **UK Car Driving License – Category B** (DVLA, Jun 2023)

Soft Skills

- ❖ QA Testing
- ❖ Technical Documentation
- ❖ Project Management
- ❖ Collaboration Tools (Discord, Trello, Basecamp)
- ❖ Adaptability
- ❖ Problem Solving
- ❖ Attention to Detail

Technical Projects

- ❖ Security-Focused Builds: Caesar Cipher Tool, PIR Motion Sensor System
- ❖ Cloud & API Work: AWS Deployment, Firebase Integration
